Better WP Security - Backup WordPress Database   Help ▾

Dashboard | User | Away | Ban | **Backup** | Hide | Detect | Login | SSL | Tweaks | Logs

Before You Begin

While this plugin goes a long way to helping secure your website nothing can give you a 100% guarantee that your site won't be the victim of an attack. When something goes wrong one of the easiest ways of getting your site back is to restore the database from a backup and replace the files with fresh ones. Use the button below to create a full backup of your database for this purpose. You can also schedule automated backups and download or delete previous backups.

Backup Your WordPress Database

Press the button below to create a backup of your WordPress database. If you have "Send Backups By Email" selected in automated backups you will receive an email containing the backup file.

[Create Database Backup]

You can manually create a backup by selecting the button to the left or enable scheduled backups. All backups will be sent to your email address (go to account details to change email address)

Schedule Automated Backups

Enable Scheduled Backups   ☑
                                     Check this box to enable scheduled backups which will be emailed to the address below.

Backup Interval   [2]   [Weeks ▾]
                                     Select the frequency of automated backups.

Send Backups by Email   ☑
                                     Email backups to the current site admin.

Email Address   [artijan@hotmail.co.uk]
                                     The email address backups will be sent to.

Backups to Keep   [3]
                                     Number of backup files to retain. Enter 0 to keep all files. Please note that this setting only applies if *Send Backups by Email* is not selected.

[Save Changes]

Backup Information

Database backups are NOT saved to the server and instead will be emailed to **artijan@hotmail.co.uk**. To change this unset "Send Backups by Email" in the "Scheduled Automated Backups" section above.

Support This Plugin

Have you found this plugin useful? Please help support's continued development with a donation of $20, $50, or even $100.
